Subject: RE: Fluoride

City of Houston maintains the ability to feed fluoride at the surface and groundwater plants. However, due to the presence of naturally occurring levels within the service area, fluoride has not been actively fed into the system in the past five years.

Thank you

[Joni Synatschk](#)

Good Morning Kenneth,

Does your team currently utilize Fluoride in any treatment process within the SEWPP or any other water treatment site for the CoH? Has Fluoride been utilized in the last 5 years?

Respectfully,

Will Marquez
